

BILL OF MATERIALS

The Bill of Materials module in IMAS is designed for the distributor or light manufacturer who performs relatively simple manufacturing, packaging or assembly operations.

FEATURES

Multiple level Bill of Materials allows you to include lower level components. This will support nine levels of bills each containing an unlimited number of components.

Flexible 'one off' Bill of Materials Maintenance which enables additional components to be added at job issue level.

Comparisons of Actual to Planned hours which can be utilised per routing step per job.

Supports Multi-Warehouse Component Issue.

Ease of Access. All maintenance and inquiries have both item list and alpha search facilities for ease of access to database information.

Creation of product information can be based on existing information, enabling easier and more efficient master file maintenance.

Automatic Cost Calculation. Run time option to initiate automatic cost calculation of the finished product. This cost can include material, labour, and any sundry costs.

Completed job history. Retention of completed job history for a user defined period.
